

Understanding Your Municipal Taxes

The Village of Montmartre raises property tax revenue each year through a combination of **Base Taxes, a Mill Rate, and Mill Rate Factors.**

A **Base Tax** is a fixed amount applied to all properties. The **Mill Rate** is then applied to a property's assessed value to calculate the remaining portion of municipal taxes. **Mill Rate Factors** are applied to Commercial and Industrial properties to adjust the share of municipal taxes paid by those property classes.

The total amount collected from all properties equals the **municipal levy** approved by Council through the annual budget process. This revenue funds municipal services and infrastructure, including roads, water and sewer systems, parks, recreation facilities, protective services, and municipal administration.
